

Please reject NAB's petition 04-160!AM and FM radio have turned into a vast wasteland - no variety and no local content. To listen to traffic and weather, you have to listen to 20 minutes of commercials and chatter - then their information is incomplete.

If it weren't for XM Satellite Radio, I wouldn't be listening to the radio at all. They have an unbelievable choice of music, and they figured out how to do weather and traffic right!

The NAB's proposal is simply a disingenious move to block competition. I urge you to block their proposal.

thank you!
